🔗 LeetCode/Rachit

## Profile

I'm about to graduate with a Bachelor of computer application degree and currently learning Full Stack Web Development and Machine Learning and data science from udemy ( just to feed my curiosity can not handle FOMO)  
The prospect of working with professionals who can guide and push me to grow both professionally and personally is what most excites me about entering the IT business.

## Languages and technology

C/C++ | Java | JavaScript | SQL | Python | React Native | HTML/CSS | Git / GitHub | Tailwind  
BootStrap | NodeJs | ExpressJs

## Projects

### Lucky Spinner, using javascript [↗](#)

- It's a game based on your luck where you spin and get random symbols.
- if you get the same symbols in every section you win, if you get different ones in every section you lose

### Employee Payroll Management System, using java [↗](#)

- Developed an Employee Payroll Management System using Object-Oriented Programming principles.
- Implemented encapsulation, inheritance, and polymorphism for a modular and scalable architecture.
- Designed a user-friendly interface for efficient data input, payroll calculation, and report generation.
